

A 3D perspective diagram of a ship's hull, viewed from a low angle looking up its length. The hull is grey with various internal compartments and structures visible in different shades of grey, black, and brown. A prominent feature is a red rectangular area near the bow. A dashed cyan line runs diagonally across the image, representing the ship's longitudinal axis. The text "longitudinal axis" is written in cyan, rotated diagonally to follow the line, and is positioned to the left of the ship's hull.
